

Moo Tunes

Dairy cows can produce up to six gallons of milk a day. Some people believe that if a cow listens to music that she likes while being milked, she gives more milk! Using the key at the bottom of the page, figure out which cow is listening to her favorite tunes and has produced the most cups of milk.

EXTRA FUN: Can you figure out which cow is in love? Thinking of dessert? Really happy?

Extra Parts

A cow seems to have a few extra body parts that people don't have. Can you break the code to find out what they are?

19-20-15-13-1-3-8-19!

The puzzle area consists of three panels, each with a cow and a collection of milk containers. The left panel shows a cow with 16 cups of milk. The middle panel shows a cow with 10 gallons of milk. The right panel shows a cow with 10 gallons of milk. Musical notes are scattered around the cows.

1 gallon = 2 half gallons = 4 quarts = 8 pints = 16 cups
