

Answer these questions about
Margaret and Angela's shell collection:

Shell collection

- If all the starfish have five arms, how many arms are there all together?
- Are there more sand dollars or snail shells?
- How many big, spotted shells are there? Are they all the same?

PUZZLE ANSWERS

Shell Collection

There are seven starfish. If each starfish has five arms, that makes 35 arms all together. There are nine sand dollars and seven snail shells. There are six large, spotted shells, and they are not all the same. The one in the lower left-hand corner of the picture is a very different shape from the others!
