

Project: Paper Cup

Level: Easy

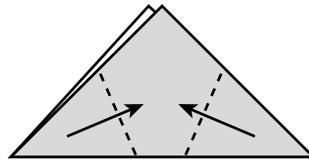

Age: 5 and up

Materials needed: Paper

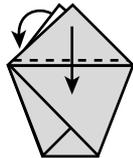

Remember: Unless your cup is made from plastic- or wax-coated paper, liquid will seep through after a while, so drink quickly!

1. Turn paper square so it looks like a diamond and fold bottom point up to top point.

2. Fold the left pointed flap toward the right and right pointed flap toward the left.

3. At the top, fold the front pointed flap down and the back flap down behind the cup.

4. Squeeze the cup open and it's ready to hold anything from nuts or candy to cold liquids if made from fairly heavy paper.
